

COMBITHERM

Thermal Covers

°COMBITHERM

Safe Transport and Storage of Temperature-Sensitive Goods

Complying with the temperature specifications in connection with transportation and temporary storage at way stations is essential to keeping the cold chain intact. With thermal covers from COMBITHERM, you always get thoroughly tested products that have proven themselves.

Among others, our solutions are used for foodstuffs, pharmaceuticals, chemicals, cosmetics and paint - and for transport by road, air and sea.

Noticeable Advantages

- Polywool, 78% rPET fibers*
- Quick, simple and safe cold chain maintenance
- Optimal protection against ambient temperature fluctuations
- Cost-efficient, even with smaller amounts of goods
- Guaranteed delivery of goods without quality reduction
- Reduces the risk of the goods being stolen as they are completely hidden

* Granules from used plastic bottles

Quality, Inside Out

COMBITHERM thermal covers have a multi-layer design with highly efficient Polywool® with spiral polyester hollow fibers. A high performance design, a broad range of foil types and customized insulation amounts ensure optimal solutions.

Individual designs and tailored execution result in covers that seal tightly around the goods and provide additional insulation value. High quality materials make COMBITHERM pallet covers very strong and ensure longevity.

- Made-to-measure
- Hygienic
- Space-saving
- Low own weight
- Easy handling
- Water-resistant

COMBITHERM thermal covers may be made from several different foil types and with varying insulation thicknesses depending of the customer-specific requirements.
